

# 10 Things People Don't Know About Medicare

1. Medicare doesn't cover everything. For example, Part B of Original Medicare will only cover 80% of your Medicare eligible expenses. You are responsible for 20% of all eligible claims with no limit in your spending.
2. There is no spending limit on Original Medicare.
3. If you do not enroll in Medicare Parts A, B and D when you are eligible, being late can result in financial penalties that could last the rest of your life.
4. Medicare will cover medically necessary care provided by medical professionals; however, it will not cover the activities of daily living.
5. Medicare doesn't provide benefits for dental, vision or hearing.
6. All Medigap or Medicare supplements provide the same coverage, however premiums can be different for each policy.
7. If you seek to enroll in either a Medicare Supplement or Medicare Advantage, you must be enrolled in Medicare Part A and B.
8. When you first enroll in Medicare, you are eligible for a no-cost "Welcome to Medicare" office visit. You should take advantage of this.
9. Medicare is not free. You must pay premiums for many aspects of Medicare. Also, your costs for Parts B and D can be higher than most if your income exceeds certain limits.
10. If your Medicare ID card still has your social security number, you need to contact SSA and get a new card issued.
